EDUCATION

Arbaminch University   2024

Bachelor of Science, Electrical and Computer Engineering   **GPA:** *3.7*

Acquired a strong foundation in software engineering, including programming, algorithms, data structures, embedded systems, and hardware-software integration through an Electrical and Computer Engineering degree

SKILLS

Programming languages: Javascript, Typescript, Python, C++

Frameworks and tools: React., Next.js, Tailwind, MERN stack, Django, Postgresql and Mongodb, Version control(Git and Github)

Languages: English, Amharic

PROFESSIONAL EXPERIENCE

Space Science and Geospatial Institute   January 2024

I worked as a fullstack developer intern on a satellite images catalog system. We used Django as our backend development framework and HTML, CSS and Javascript on the frontend.

- I helped develop authentication, search and filtering and payment integration features.
- I also helped set up a file server to fetch the images.

Eshet Foods LLC   March 2020

I developed a landing page for the company to promote their products.

- I used HTML, CSS and Javascript for the frontend.
- I used Node.js to handle the email notification for the contact form on the website.

PROJECTS

Marefiya   August 2024
- A full stack real estate discovery and management web app built using Next.js, Tailwind and Postgresql.
- Full code and live website on my github.

Magic Notes   July 2024
- A full stack Notes app with a rich text editor and AI(Gemini) integration built with Next.js, Tailwind and Mongodb.
- Full code and live website on my github.
